

1 Increase of the benefit of the product

- » Save money on spares.
- » Ended product, save money on labour costs.
- » Stackable: save space in the shipment and on board.

2 Designed for the marine environment

- » Designed in a colour that camouflages with its surroundings, difficult to detect.
- » No degrade with the sun or the water.
- » Resistant to deformation.
- » Works in extreme conditions.

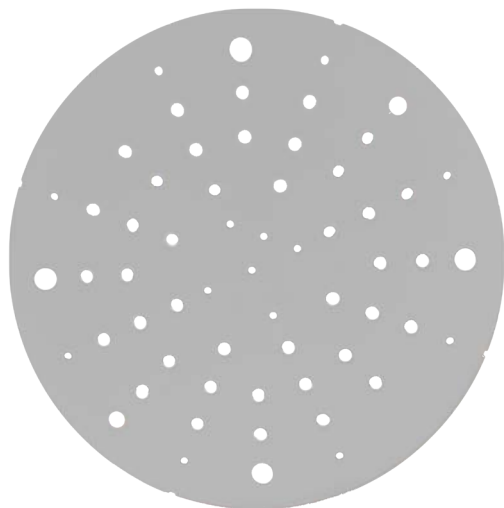

3 Environment friendly

- » Recyclable and reusable.
- » Less waste and less environmental impact.
- » Traceability of the fad.

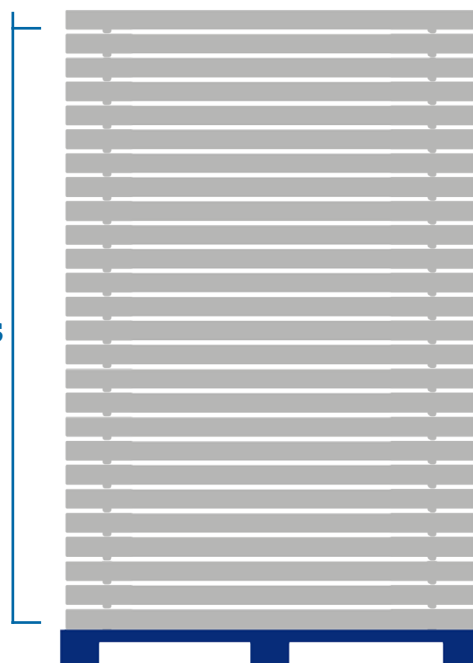

ZunFloat is the floating platform developed by Zunibal for tuna fishing. A reusable product that allows a great money saving on materials, labour and transport. It also camouflages in the marine environment, that helps to avoid losses.
